Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: the attorney of record explains the limitation of "substantially" original recited in claim 1, and supported in the specification page 9, line 2, is to demonstrate the fact that no system is perfect. Although the goal of applicant's invention is to eliminate the ambient light noise completely by subtracting the second image from the first image, due to nature of the system, there might still be some negligible noise left. Upon further review of specification, and in light of applicant's arguments, the examiner agrees the noise elimination process proposed in the applicant's invention is different from the prior art .
